

# International Peace Cooperation Assignments

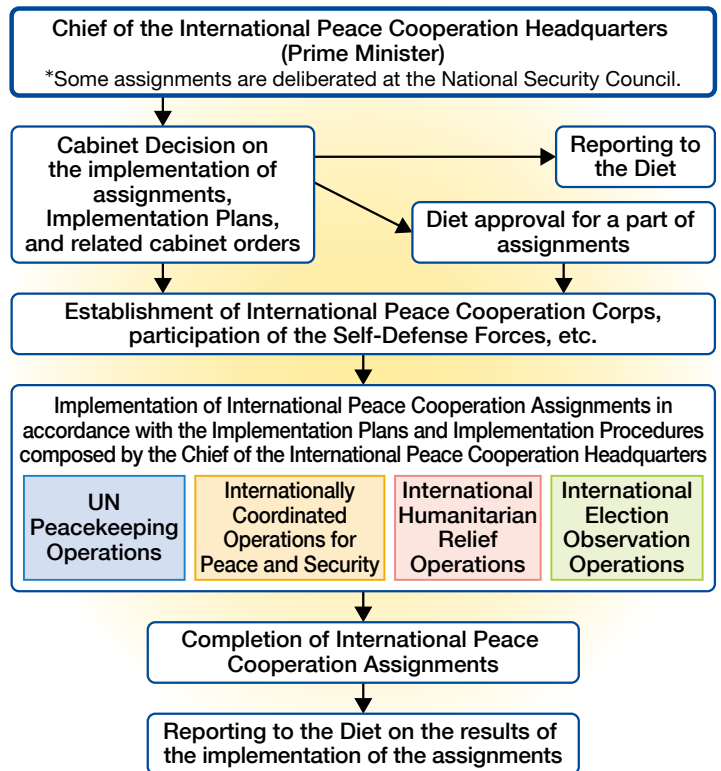

Japan dispatches International Peace Cooperation Corps to UN Peacekeeping Operations, Internationally Coordinated Operations for Peace and Security, International Humanitarian Relief Operations, and International Election Observation Operations to undertake the following activities:

- Monitoring the observance of cease-fire and disarmament of armed forces;
- Repair or maintenance of facilities and equipment that are of daily use to the conflict-affected population;
- Distribution of food, clothing, medical supplies and other daily necessities to conflict-affected population;
- Provision of advisory, guidance and supervision on correctional administrative work;
- Observation or management of fair execution of elections or voting.

Japan has so far dispatched International Peace Cooperation Corps 28 times to Asia, Middle East, Europe, Africa, Latin America and the Caribbean.

As of April 2019, Japanese International Peace Cooperation Corps is engaged in UN Missions in South Sudan (UNMISS) and the Multinational Force and Observers (MFO) in the Sinai Peninsula.

## ● Flow Chart of International Peace Cooperation Assignments

## Contributions in Kind

Japan provides necessary goods and supplies to the UN and other international organizations, which are engaged in UN Peacekeeping Operations, Internationally Coordinated Operations for Peace and Security, International humanitarian relief operations and International election observation operations. These contributions have supported UN Peacekeeping Operations and refugee relief operations.

## Humanitarian Relief Supply Stockpile Scheme

In order to respond quickly to the needs of in-kind contributions to the International Humanitarian Relief Operations, Japan established a stockpile scheme for humanitarian relief supplies in 1997. Tents, blankets, water containers, plastic sheets and sleeping mats are stored in a warehouse in the United Arab Emirates to respond to emergency requests.

### 〈Tent〉

The tent is made of thick breathable canvas materials to shut out direct sunlight and moderate room temperature. The tent has a simple design and it is easy to repair. (4m x 4m; capacity: for one family use)

### 〈Sleeping mat〉

The three-layered foamed core material allows for comfortable sleep even on hard surfaces.

### 〈Blanket〉

The warm, durable and easy-to-dry fleece blanket is made of recycled plastic bottles.

### 〈Plastic sheet〉

The sheet is highly versatile and can be laid on the ground or used for roofing. (4m x 5m)

### 〈Water container〉

The container is lightweight, foldable and portable, made of durable polyethylene. (Capacity: 10 litres, equal to the daily amount needed for one person.)
